

Dear Potential Sponsor,

We would like to invite you to sponsor our mission for this academic semester (Spring 2018)! Hack4Impact @ UIUC is dedicated to connecting student developers with nonprofits to develop impactful software that help nonprofits further their mission and better engage their clients. Last semester, we successfully launched our first cohesive web product for the Neighborhood New Bureau and we are excited to expand to working with five nonprofits this semester! Join us as we increase the awareness of technology's potential for good!

The Computer Science and Electrical & Computer Engineering departments at the University of Illinois are ranked among the top five engineering programs in the nation. Sponsoring Hack4Impact will give you the ability to:

- Develop relationships with top caliber students with experience in developing cohesive software products that truly impacts the world.
- Showcase your brand across the CS and ECE community
- Have access to member resumes and contact information
- Support the Tech X Social Impact Movement

Receiving sponsorships will allow us to keep development fees lower for nonprofits and provide our members with an even better experience. We are also very eager to foster connections between our members and your company.

The next page has more details on how you can collaborate with Hack4Impact UIUC. If you have any questions, please reach out to our External Relations Chair, Anton Wu at awu25@illinois.edu.

We look forward to working with you to make Hack4Impact a valuable experience for both your company and our members.

Thank you,

The Hack4Impact UIUC team
